Portfolio

Indonesia

SUMMARY

Highly motivated IT Professional bridging the gap between technical development and business operations. Equipped with a solid foundation in Informatics Engineering and practical expertise spanning full-stack web development, server administration, and infrastructure management. Demonstrated capability in leading operational centers and executing complex projects from planning to deployment. Possesses a strong analytical background enriched by experience in the finance sector and seeks to leverage a unique blend of technical acumen and operational efficiency in a remote or Yogyakarta-based role.

EDUCATION

Bachelor of Informatics

Alma Ata University

09/2022 - 09/2026

3.71

Yogyakarta, Indonesia

EXPERIENCE

Tech Trainer & Data Administrator

Yayasan Sagasitas Indonesia

07/2021 - Present

Yogyakarta, Indonesia

- Delivered comprehensive training sessions on AWS Cloud Computing technology, equipping participants with foundational cloud infrastructure skills.
- Managed data entry and database administration for training participants, ensuring high accuracy and streamlined data processing.
- Organized and executed technology workshops, facilitating effective communication and technical learning for diverse audiences.

Full-Stack Developer (Internship)

Balai Tekkomdik DIY (BTKP DIY)

05/2025 - 08/2025

Yogyakarta, Indonesia

- Developed a comprehensive web-based Internship Management System utilizing the Waterfall development methodology.
- Architected and deployed the application using CodeIgniter 4 / PHP Native, ensuring responsive design and efficient database interactions.
- Implemented automated testing workflows using Cypress to identify bugs and ensure high system reliability before deployment.

Head of Operation Center

ToscaFlow Tech Solution

06/2024 - Present

Yogyakarta, Indonesia

- Led the end-to-end server administration and infrastructure management using Proxmox, aaPanel, and OPNsense firewalls.
- Successfully executed business domain migration to the toscalow.id domain, including the configuration of custom SMTP email services via Cloudflare Tunnels and Brevo.
- Compiled and optimized custom Linux kernels (e.g., ToscaFlow-System) to enhance server performance for internal development environments.

Retail Verification Officer

Berijalan (Astra Credit Companies)

12/2024 - 12/2025

Yogyakarta, Indonesia

- Conducted rigorous retail verification processes, ensuring compliance with standard operating procedures.
- Utilized strong analytical skills to assess data accuracy and mitigate operational risks in a high-paced financial environment.
- Executed telemarketing strategies, demonstrating excellent communication and negotiation skills.

PROJECTS

BTKP DIY Internship Management System

CodeIgniter 4, PHP, Cypress, SQL Database Architecture

Developed a comprehensive web-based platform from scratch to streamline the internship administration process at Balai Tekkomdik DIY. Applied the Waterfall software development life cycle (SDLC) to ensure structured progress. Architected the database schema and independently implemented automated end-to-end testing using Cypress to guarantee system reliability and eliminate critical bugs prior to deployment.

ToscaFlow IT Infrastructure & Network Architecture

Proxmox, aaPanel, OPNsense, Cloudflare Tunnels, Brevo SMTP

<https://toscaflow.id/>

Architected and deployed a robust server environment to support business operations. Successfully configured remote server access without a public IP using Cloudflare Tunnels and secured the network utilizing OPNsense firewalls. Executed full domain migration, SEO indexing, and integrated custom business email services. Additionally, compiled and optimized a custom Linux kernel (ToscaFlow-System) specifically tailored for the development environment.

PressApp - Advanced SaaS Attendance Platform

Capacitor, Geolocation APIs, Biometric Integration, Web Technologies

Developed a comprehensive SaaS product for employee attendance management under ToscaFlow. Engineered core features including precise geolocation tracking, biometric validation, live selfie capture, and automated CSV reporting. To ensure high-level security and prevent fraud, successfully built a dedicated Android wrapper utilizing Capacitor, implementing strict device binding protocols.

CTEFL CBT & Secure Exam Browser Platform

CefSharp, Web Technologies, Secure Browser Architecture

🔗 <https://ctefl.poltekkesjogja.ac.id/>

Designed and engineered a commercial Computer-Based Test (CBT) platform specifically for English language certification (CTEFL Poltekkes Kemenkes Yogyakarta). To guarantee the integrity of the examinations, developed a custom, highly secure exam browser application utilizing CefSharp. This custom browser enforces strict anti-cheating protocols and restricts system access during live tests, ensuring a highly reliable and secure testing environment.
